

Restoration of healthy skin

Skin health restoration including a resurfacing peel can now be carried out with minimum discomfort and to maximum effect – thanks in large part to the significant advances in skin research and technology in recent years. Our comprehensive skin restoration package will leave you with radiant skin while reducing fine lines and enhancing skin texture.

Thread vein treatment

When was the last time you showed off those legs of yours? Well, now you can do just that.

A series of small injections to the affected area is all it usually takes, and in most cases the veins will fade over a period of between two and eight weeks, and in many instances completely disappear.

Weight Loss

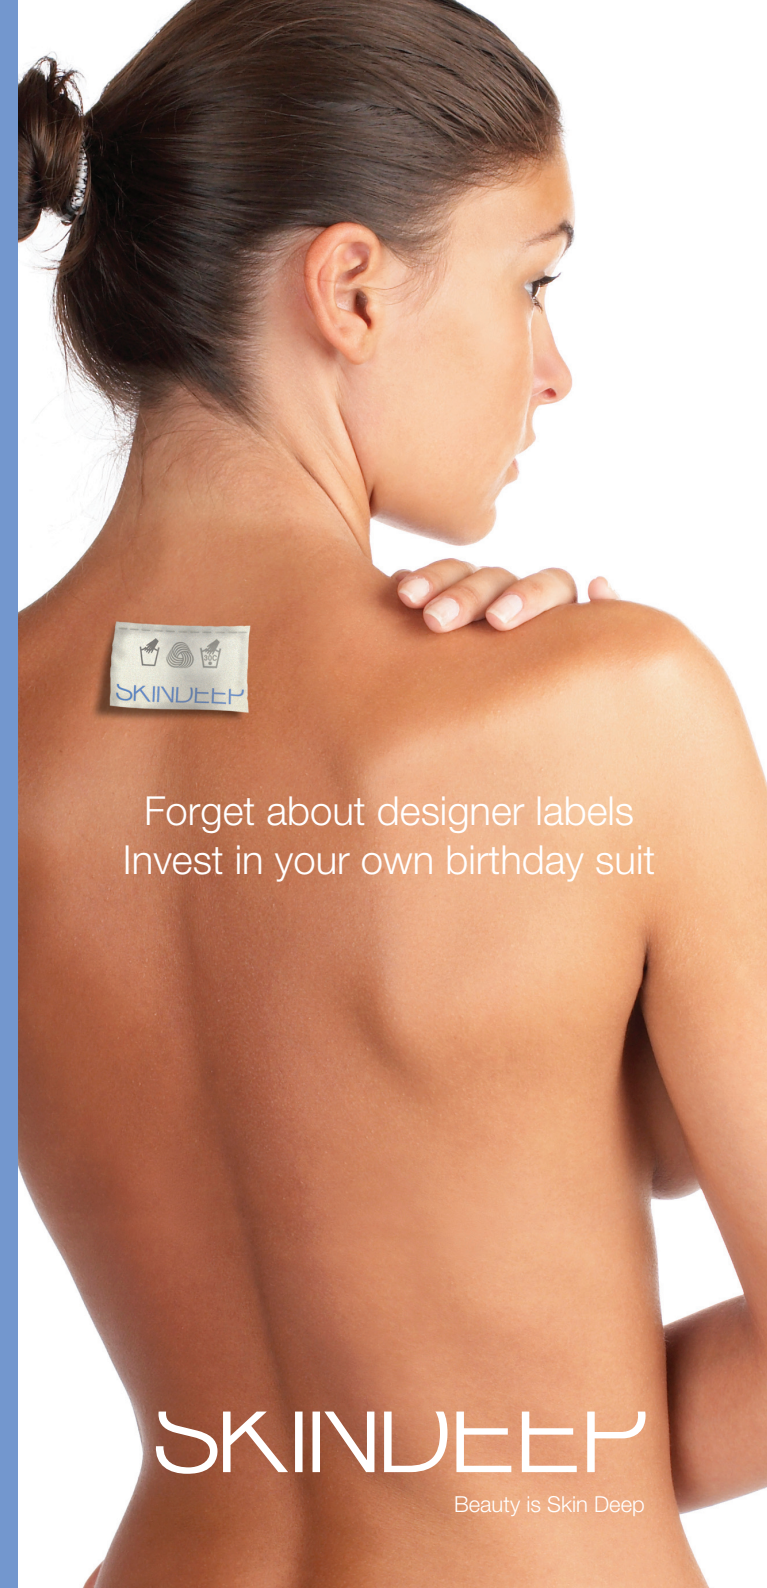

A sensible diet and exercise regime are all very well, but in very many instances they simply cannot impact on specific areas of fat. But now thanks to the very latest medical expertise, you can resort to several tried and tested procedures. These include a non-surgical lipo treatment therapy, which can very effectively remove unwanted bulges through a simple course of injections, and a special surgical procedure for the middle and lower abdomen known as Abdominoplasty, otherwise known as the 'tummy tuck'.

If you would like to discuss your requirements and arrange a free consultation, please call us on 0845 833 9866 or visit www.skindeepmedical.co.uk Needless to say, all our medical practitioners are experts in their field and carry out all procedures to the most exacting and professional standards. So you can rest assured that you will be in very capable hands.

SKINDEEP

Beauty is Skin Deep

There was a time when seeking medical assistance to enhance your looks and set back the signs of ageing would have seemed a trifle drastic, unnecessary and expensive. How times have changed.

Today, advances in medical science have made it possible to challenge the ageing process and restore the youth and subtlety of your skin through simple, painless and relatively inexpensive procedures; all of which are entirely non-surgical.

So before you go out on a shopping spree for this season's must-have fabrics, perhaps you should consider that really important fabric that says more about you than anything else; your skin.

Skin Deep. A new service for a new looking you.

Skin deep is a new name in medical non-surgical cosmetic procedures, but those behind this new service are some of the industry's most experienced and professional specialists. Indeed, you can rest assured that you will be in the hands of a highly skilled and qualified team of medical practitioners.

We can provide a comprehensive range of treatments that are both affordable and highly effective.

So if you thought cosmetic beauty enhancement was the sole preserve of the rich and famous, think again.

Removing lines and folds

By using natural products already present in your skin, we are able to carry out a series of tiny and very precise injections which will smooth away feathery lines, lift those deeper lines and generally add volume to your skin. In this way, we can enhance the cheekbone and jaw line to add definition. The effects of this treatment are instant, and the absorption of the products through the body's natural process makes this treatment perfectly safe.

Softening expression lines

Over a period of no more than two weeks, we can soften and smooth out all those expression lines such as frown lines, forehead lines and crow's feet – leaving you looking and feeling revitalized and youthful. So popular is this form of treatment that the vast majority of those who try it, repeat it.

Lip enhancement

Now you can follow in the steps of Hollywood stars and leading fashion icons by opting for our lip enhancement and definition skills. By using safe, natural products specially selected to give extra softness and youthful fullness to your lips, we can certainly enhance your image and, dare we say it, lend a dash of glamour and sex appeal. In doing so, our medical practitioners will employ anaesthesia to avoid the merest hint of discomfort during treatment.
